Reason Codes setup Options
You will need to add your reason codes for your Aux Reason Codes and Log Out Reason Codes when you are logging in and out between the two of them.

Click on your System Options and System Setting top right corner of your Tool bar.

Click on Reason Codes.
To do this highlight the **root** and click on the ( + ) on the right side down below. Put in the number of your reason code and type the name of it like I have below.

**Note:** You may have other reason codes you use that are not listed below. You can still add others on top of the one below.

**Example:**

![Image showing System Settings with Reason Codes highlighted and additional reason codes added]

Click OK when finished.
Using the Avaya one-X Agent 2.5.4

Make a Call
Type in the phone number you want to call in the field below or open the Dial Pad and double click on your Line button or press Enter on your keyboard.

Receiving a Call click the Answer Call button.

After clicking the Answer Call button you will get the additional buttons on your tool bar.

**Hold Call, Transfer Call, and End Call**
Placing a **Caller on Hold** with the corresponding button, you may resume the call by clicking the **Unhold call** button.

**Cold Transfer a call**, use the **Transfer Call** button and enter the extension you wish to transfer to, confirm the transfer by selecting the transfer button directly to the right of the extension input field.

**Warm Transfer a call**, use the **Transfer Call** button to transfer the call to an agent using the text input field, in the Work List window, click **Transfer Call > EnterValue**.
1. The system puts the first party's call on hold and dials and creates a new call in the associated work item.

2. Wait for the third-party to answer the call and announce the call transfer.

3. If the third-party agrees to accept the impending call, click **Consultative Transfer**.

Conferencing a Call, 
Place the caller on Hold

Dial the party you want to conference in.
Select the **Add Conference to Workitem** and click on the phone number or Extension you want to conference in.

Now all parties are Conferenced in.

**Work Log**, click on the Work Log button to view your phone call history.
Logout for Lunch or End of Shift

Click on the **Logout button** and enter in your logout **reason code**.

![Logout screen](image)

**To go into Aux mode** (Busy Mode)

Select **Auxiliary** and select the correct **Reason Code** you created from page 14.

![Auxiliary screen](image)

Logout of Station Hardcore Extension for the day.

Select **System Options, Exit**

![System Options](image)
Setting up the Avaya one-X Agent 2.5.4 Preferences

Select Favorite buttons to have displayed on tool bar.
Click back on System Options. Select Agent Preferences and click on User Interface. Click on the “Select Favorite Buttons”
Here you can select what buttons you want to have displayed on your tool bar as shown below.
Avaya One-X Agent 2.5.4 Quick Reference

Avaya one-X Agent main window

Avaya one-X Agent occupies as little space as possible on your computer screen and provides a common look-and-feel providing a flexible GUI configuration option to match the type of work an agent performs. The main window provides complete access to all features of Avaya one-X Agent.

The following illustration explains most of the components of the main window

1. Top bar
2. Work List window
3. Action bar

*Note: Certain features will not be available in the application, if you have not logged into the Automatic Call Distribution (ACD) service in Communication Manager.

Top bar

The top bar appears on top of the main window. The top bar provides the system status and main controls to operate Avaya one-X Agent. The following illustration explains the different parts of the top bar.

1. Message Waiting Indicator
2. Agent Status Indicator
3. Common controls
4. System Menu
5. Graphical user interface controls
Work List window

The Work List window consists of work items and control buttons corresponding to the work item. The controls and functionalities change depending on the work list window behavior. The table below explains controls and icons that appear on the work list window during an active call.

The top right corner of the Work List window has work item controls. These controls are common to all work items in the Work List window. When a call arrives, the system notifies the corresponding call details in the work list window. When you accept the call, the control buttons appear for the associated work item.

The illustration below explains the Work List window and its elements.

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Work item controls and functionalities</td>
</tr>
<tr>
<td>2</td>
<td>Work Item controls</td>
</tr>
<tr>
<td>3</td>
<td>View Work Item information</td>
</tr>
<tr>
<td>4</td>
<td>Media appearance states</td>
</tr>
<tr>
<td>5</td>
<td>Media controls</td>
</tr>
</tbody>
</table>

Action bar

The action bar provides global controls, such as, creating a new work item, searching a contact, initiating a media element, and opening the secondary windows. The action bar stays at the bottom of the main window and remains at the bottom as the window expands.

The following illustration explains the action bar and its elements.

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>New Work menu</td>
</tr>
<tr>
<td>2</td>
<td>Text Input field</td>
</tr>
<tr>
